EDUCATION

Brown University

Sc.B., Mechanical Engineering · GPA 3.96 / 4.00

APIA Nakupuna Foundation Scholarship · AMGEN Scholar · UTRA Scholar · ABRCMS travel award

Providence, RI
Sep 2023 – May 2027

RESEARCH & ANALYTICAL PROJECTS

“What a Pill Is Worth”: Oral GLP-1 Pricing and Market Entry

Self-initiated analysis

2026

ohmppatel.dev/Oral-GLP1-Pricing.pdf

- Researched how a new drug format should price against the incumbents that built its market, decomposing efficacy gap, convenience, access, and cost-to-serve into an illustrative price ceiling.
- Segmented four payer and patient willingness-to-pay tiers and recommended a volume-and-access launch at roughly a 45% discount, built from public filings alone and written for a non-specialist reader with explicit conditions under which the recommendation fails.

SideOut: Market Sizing and Competitive Assessment

Self-initiated venture

June 2026 – Present

github.com/ohmppatel920/sideout

- Sized an underserved market segment against incumbent spend of ~\$1,200 per account annually and assessed Hudl, Balltime, and open-source alternatives on features and price.
- Translated that research into a staged entry plan positioned against the gap incumbents left open, then built and launched the first release.

EXPERIENCE

Eli Lilly & Company

Data & Software Intern

Indianapolis, IN
May – Aug 2026

- Interviewed scientists across a biopharmaceutical R&D department to identify which manual workflow carried the highest cost, synthesizing qualitative findings into requirements.
- Delivered the internal application replacing that workflow, reducing manual effort ~40% and onboarding 15 users across multiple drug discovery programs.
- Tracked adoption after launch and rebuilt components where usage data contradicted stated requirements, collaborating with engineering and operations through rollout and presenting findings to the department.

Yale University, Schools of Engineering & Medicine

Engineering Researcher; AMGEN Scholar

New Haven, CT

May – Aug 2024 & May – Aug 2025

- Selected for a competitive national research program across two summers at Yale School of Medicine, quantifying 8 cellular markers in high-dimensional flow cytometry data.
- Led research direction under undefined scope, reviewing primary literature to prioritize experiments and presenting findings to the lab each cycle; co-authored a manuscript under review at Springer Nature.

Brown University, School of Engineering

Engineering Researcher; UTRA Scholar

Providence, RI
Sep – Dec 2024

- Automated weekly intake and validation for a 10-week study, processing 150 samples per week and structuring 1,500 records into the validated dataset supporting all downstream analysis.

LEADERSHIP

Brown Journal of Healthcare Advancement

Editor-in-Chief & Director

Providence, RI
Sep 2023 – Present

- Direct a student healthcare publication across 3 published cycles, setting editorial direction and leading 8 editorial teams through workshops and draft review.
- Translate dense clinical, regulatory, and policy research into written analysis a general audience can act on; own budget allocation and operations.

Brown University Men's Volleyball

Outside Hitter & Captain

Providence, RI
Sep 2023 – Present

- Captained Brown to its first D1AAA national championship, owning pre-match opponent research, in-game tactical decisions, and team travel, budget, and roster logistics.

SKILLS

Analytical: Excel, PowerPoint, Word · market sizing, competitive assessment, pricing and cost-benefit modeling, quantitative benchmarking, statistical analysis · Python, SQL

Research: Primary and secondary research, scientific and industry literature, market reports and public filings, stakeholder interviews, data collection and validation

Communication: Written analysis and recommendations for non-specialist readers, editorial direction, presenting findings to stakeholders
